### Profile

---

Results-driven Computer Engineering graduate specializing in full-stack web development with the MERN stack, delivering scalable, high-performance applications with a strong focus on user experience and clean architecture. Experienced in designing and integrating APIs, optimizing performance, and building production-ready systems. Combines solid technical expertise with real-world domain knowledge in GDS travel systems (Amadeus), enabling the development of practical, business-oriented solutions. Adept at problem-solving, debugging, and writing maintainable, efficient code. Proven ability to work in freelance and remote team environments, with strong communication skills, adaptability, and a commitment to continuous learning and delivering impactful results.

### Internships

---

#### ITI Intensive Code Camp – MERN Full Stack Development

May 2024 – Oct 2024

Information Technology Institute (ITI) Completed a **4-month intensive training program** focused on building enterprise-level applications.

### Education

---

#### Bachelor's Degree In Computer Engineering (Port Said University)

Graduation Project: Car Care, Flutter Grade: Excellent

2018-2023

### Experience

---

- **Customer Service Representative (Travel Agency – GDS) | Concentrix Egypt – On-site | Mar 2025 – Dec 2025**  
Description: Delivered end-to-end travel support using Amadeus GDS, handling bookings, modifications, cancellations, and customer inquiries across multiple channels. Maintained high service quality under SLA-driven environment while managing high daily ticket volume.  
Achievements:
  - Processed 300+ bookings with 95% customer satisfaction rate
  - Handled 40+ daily support cases with 100% SLA compliance
  - Supported international clients via chat, email, and voiceTechnologies & Tools: Amadeus GDS | Ticketing | PNR Management | Customer Support | SLA Handling
- **Front-End Developer (Freelance – Shopify) | Eddy.ae (UAE) – Remote | Sep 2024 – Oct 2024**  
Description: Developed and customized Shopify storefronts with focus on performance, responsiveness, and conversion optimization. Implemented modern UI/UX inspired by global brands.  
Achievements:
  - Customized 3 Shopify themes improving performance by 30%
  - Built responsive Nike-inspired UI optimized for mobile usersTechnologies & Tools: Shopify | Liquid | HTML | CSS | JavaScript | Responsive Design | Performance Optimization

## Projects

---

- **Book Store System (Full Stack)** | [GitHub](#) | [Demo](#)  
Description: A full-stack bookstore system divided into three main applications: user frontend, admin dashboard, and backend API. Users can browse books, search, and view details, while admins can manage products, orders, and users through a dedicated dashboard. Backend provides secure REST APIs with authentication and data handling.  
Technologies & Tools: React | Vite | Tailwind CSS | Node.js | Express | MongoDB | JWT Authentication | REST APIs | Admin Dashboard
- **Game Platform (Frontend + Backend)** | [GitHub](#) | [Demo](#)  
Description: A web-based gaming platform that allows users to explore and play games. Includes user authentication, game listings, and API-driven backend with scalable deployment.  
Technologies & Tools: React | Node.js | Express | MongoDB | JWT | REST APIs | Vercel | Railway

## Technical Skills

---

- **Languages:** JavaScript, TypeScript, HTML, CSS, Sass
- **Front-End:** React, Next.js, Angular, Bootstrap, Tailwind
- **Back-End:** Node.js, Express.js
- **Database:** MongoDB
- **Software Engineering:** OOP, Design Patterns, Data Structures & Algorithms
- **Tools:** Git, GitHub, Shopify (Liquid), VS code, postman
- **Other:** Amadeus GDS

## Certifications

---

- IT Support Associate – Google (Oct 2021)
- Principles of UX/UI Design – Meta (Aug 2024)
- Advanced React – Meta (Sep 2024)

## Languages

---

- **Arabic** – Native
- **English** – B2 (Upper Intermediate)
